

Caritas

St. Elizabeth's Medical Center

Neurology Technician

Department: Neurology

Hours: 20 - 40

Tasks, Duties, Responsibilities:

- Learn about what causes human neurodegenerative disorders like Alzheimer's disease, Parkinson's disease and ALS
- Learn about experimental techniques used to understand human neurodegenerative disorders and the animal models we use
- Learn and perform techniques to study changes in brain structure caused by neurodegeneration
- Learn and perform basic biochemical analysis of brain proteins involved in neurodegeneration
- Put your math and science knowledge to use so you can better understand biology and begin to think about career choices in biotechnology, graduate school, pharmacy or medicine - don't worry, we'll teach you everything you will need to do well in this internship.
- Interns will pick a mini project and take it to completion in 6-8 weeks.
