

Tech Apprentice

Cultivating tomorrow's tech workforce today

BOSTON PRIVATE INDUSTRY COUNCIL

Program Overview

Tech Apprentice is a paid six- to seven-week summer internship program for tech-savvy Boston public high school students who want to work in tech departments across a range of industries in Boston. Now in its 14th year, Tech Apprentice is part of the Mayor's Summer Jobs Program and has connected more than 1,200 Boston public high school students with summer internships. Students work on a range of technology projects based on employer need and the skill level and interests of the intern.

Program participants are paid a minimum of \$12/hour for about 35 hours/week, and earn approximately \$3,500 over the course of the summer. The program targets Boston public high school students who are at least 16 years old.

Many students in the program are also participating in Advanced Placement (AP) computer science courses, technical pathways, robotics teams, coding clubs, and college tech outreach programs. The students are considering pursuing IT majors in college and are eager to gain relevant work experience.

Internship Types

- Software - programming, coding, quality assurance (QA)
- Web Development
- Help Desk/Support
- Digital and Social Media
- Database

Get Involved

We are actively seeking new host sites for summer 2019 Tech Apprentice interns. In addition to hiring interns, we rely on employer partners to support the program by providing career exploration opportunities. We are seeking volunteers to provide 1) guest speakers, 2) company tours, and 3) technical workshops.

"I think many people would be surprised at the level the summer interns function at in the workplace and what they are able to accomplish in such a short period of time. Our Chief Information Security Officer was ecstatic with their contributions during their internship."

-James Noga,
Chief Information Officer,
Partners HealthCare
